**Term-End Practical Examination
June, 2026**

**MGYL-104(Set-II) : GEOINFORMATICS
LABORATORY**

Time : 3 Hours

Maximum Marks : 50

Note : (i) *All questions are compulsory. Marks are indicated against each question.*

(ii) *Evaluation would be done under three parameters (i. e., performance, result/outputs and viva-voce).*

-
- (iii) *The data to be used in the examination are to be provided by the examination centre in the computer allotted to you.*
- (iv) *The data to be used for the examination are in the folders named as A, B, C, , which are mentioned in the question paper as (A), (B), (C),, respectively.*
- (v) *Keep all the soft copy results/outputs appropriately in the computer in a folder with your enrollment number, other answers are to be written in the answersheet.*
- (vi) *Incomplete or illegible results/outputs will not be evaluated.*
-

1. Perform the following tasks and submit the results/outputs :

- (a) Extract contours of 100 m interval and create an aspect map from the given data (A). Compose a map showing the DEM in pseudocolour, extracted contours and the aspect map with appropriate labelling and map elements.

2+3

- (b) Create a colour composite from the given dataset (B) through layer stacking. 2
- (c) Generate a supervised classified image (using maximum likelihood classifier) having any *four* land use land cover classes (including the three classes i.e. built up, vegetation and water body). Prepare a map showing the FCC and the classified image with all the map elements. 4+2
- (d) Georeference the data (D). Digitise any *five* major habitations with appropriate attributes. 2+5
- (e) Prepare a map showing the digitised features overlaid on the georeferenced map with all the suitable map elements. 2

- (f) Perform complex attribute query operation on the given data (C) and generate a map showing places with population less than 10 lakhs in India with appropriate labelling and map elements. 1+2

2. Viva-voce.
